- PURE SINE OUTPUT

ONLINE UPS · SINGLE-PHASE IN / SINGLE-PHASE OUT

15 kVA ONLINE UPS

Uninterrupted, clean and stable power for single-phase critical loads

15 kVA

Rated power

1/1 phase

Single-phase input, single-phase output

0 ms

Transfer time on outage

GENERAL FEATURES

The ELSiPOWER 15 kVA 1/1-phase online UPS provides uninterrupted, clean and stable power for critical loads fed from a single-phase supply. Thanks to its online double-conversion design, outages, voltage fluctuations and electrical noise never reach connected equipment; when the mains fails, the load continues on battery power without any interruption. With its modern compact cabinet, quiet operation and smart battery management, it is an ideal solution for offices, server rooms, medical devices and small businesses.

KEY FEATURES

- Continuous, clean power with online double-conversion technology
- Reliable DSP (digital signal processor) controlled design
- Grid-friendly operation with input power factor correction (PFC)
- Digital front panel showing operating information
- Smart battery management for long battery life
- Quiet operation with smart fan control
- Pure sine-wave output
- Wide input voltage range that reduces battery usage
- Cold start: switch on from batteries without mains
- ECO mode for energy saving
- Short-circuit, overload and over-temperature protection
- Remote monitoring with optional SNMP card

APPLICATIONS

Buildings

Server systems

Medical facilities

Industrial plants

Transportation systems

Emergency systems
