- ONLINE DOUBLE-CONVERSION
- PURE SINE OUTPUT

ONLINE UPS · THREE-PHASE IN / SINGLE-PHASE OUT

15 kVA ONLINE UPS

Uninterrupted, clean power from a three-phase supply to single-phase loads

15 kVA

Rated power

3/1 phase

Three-phase input, single-phase output

0 ms

Transfer time on outage

GENERAL FEATURES

The ELSiPOWER 15 kVA 3/1-phase online UPS is fed from a three-phase supply and delivers uninterrupted, clean power to single-phase loads. By distributing the load evenly across three phases it eases the burden on the grid, while its online double-conversion design ensures that outages, voltage fluctuations and electrical noise never reach connected equipment. It is a reliable, quiet and easy-to-use solution for businesses with three-phase infrastructure, server rooms, medical devices and industrial control systems.

KEY FEATURES

- Continuous, clean power with online double-conversion technology
- Reliable DSP (digital signal processor) controlled design
- Grid-friendly operation with input power factor correction (PFC)
- Digital front panel showing operating information
- Smart battery management for long battery life
- Quiet operation with smart fan control
- Pure sine-wave output
- Fed from a three-phase supply for balanced load distribution across phases
- Cold start: switch on from batteries without mains
- ECO mode for energy saving
- Short-circuit, overload and over-temperature protection
- Remote monitoring with optional SNMP card

APPLICATIONS

Buildings

Server systems

Medical facilities

Industrial plants

Transportation systems

Emergency systems
